

The image is a screenshot of a web browser window. At the top, the browser's title bar shows "New Tab" and a single tab. The address bar contains a Google search bar with a blue star icon on the right. Below the address bar, there are navigation icons (back, forward, refresh, home) and a search bar with the text "Search". To the right of the search bar, there are links for "DICTIONARY", "ABOUT", and "LOGIN". The main content area displays a list of search results. The first result is "VERSION 1" in large, bold, black letters. Below this, there is a list of search results with the following structure: a list of letters (A, B, C, D, E, F, G, H, I, J, K, L, M, N, O, P, Q, R, S, T, U, V, W, X, Y, Z) in a smaller font, followed by a list of search results. Each search result consists of a term (Term 1, Term 2, Term 3, Term 4) and a corresponding description. The descriptions are identical for all terms, starting with "But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is pleasure, but because those who do not know how to pursue pleasure rationally encounter consequences that are extremely painful. IMAGE". The browser's status bar at the bottom shows "Page 1 2 3 ... 5".

This version displays a search bar along the navigation. There is a box with the alphabet to select the letter the term starts with as well. Each page shows a list of at least 4 terms. The definition for each term is to the right of each. There is a link where image(s) can be shown which is found after the definition.

Pros:	Cons:
<ul style="list-style-type: none">• Search bar• Not all terms load at once• Images are linked	<ul style="list-style-type: none">• Definitions are crowded• The use of pagination was not wanted• Not all terms are shown

The image is a screenshot of a web browser window. At the top, the browser's address bar shows "New Tab" and a search bar with a "G" icon. Below the address bar, the website header displays "VERSION 2" in large, bold, black letters. To the left of the header, there is a navigation menu with links: "DICTIONARY", "ABOUT", and "LOGIN". Below the header, there is a search bar with the text "Search" and a horizontal line underneath. Below the search bar, there is an alphabet bar with letters A through Z. The letter "I" is highlighted with a vertical line. Below the alphabet bar, there is a list of terms: "Term 1", "Term 2", "Term 3", "Term 4", "Term 5", "Term 6", and "Term 7". "Term 2" is selected, and an arrow points from it to the right. To the right of the arrow, the definition of "Term 2" is displayed: "Definition: But I must explain to you how all this mistaken idea of denouncing pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder". Below the definition, there are two placeholder images, each labeled "IMG". At the bottom of the page, there is a section titled "For more information:" followed by two URLs: "https://url.com" and "https://url.com".

This improved version also has a search bar and a alphabetical index. However, all of the terms for a specific letter can be shown on the same page. With the use of the scroll bar there is no need for pagination. Also, the definition and images are only shown for the term selected instead of all terms which helps load time.

Pros:	Cons:
<ul style="list-style-type: none">• All terms load on one page• Able to show better definition• Scroll bar better than pagination	<ul style="list-style-type: none">• The specifications wanted all terms AND definitions• Is the selected term visible enough?•
