This page is accessed after clicking on the book button in the set appointment page. The customer gets a full detail of the appointment and is able to see the price. If the customer has to add a payment card, they will do so in this screen.

Next to the payment options is a full summary that also includes the appointment reminder.

After submitting the payment, the customer sees their appointment details again. At the bottom of the details the customer is reminded that they will receive a reminder in the way they chose before.
